ManipulateAnimals.java

```
package com.implement;

import java.util.ArrayList;
import java.util.List;

import com.polymorphism.MainInterf;

public class ManipulateAnimals {

    public static void main(String[] args) {

        // Make ArrayList Object with super interface for call All function
        List<MainInterf> list = new ArrayList<MainInterf>();

        //make Object and add in list For Save
        Animal animal_1 = new Animal("A1");
```
